-! FUNCTION: May be involved in processing, maturation, or secretion of extracellular enzymes.

-! SUBCELLULAR LOCATION: Membrane-bound (Potential).

-! INDUCTION: Transcription is css dependent. Induced by heat shock during exponential growth and by heterologous amylases at the transition phase of the growth cycle. Negatively regulates its own expression during exponential growth cycle. Negatively regulates its own expression during exponential growth and during heat shock.

-! MISCELLANEOUS: Inactivation results in compensating overexpression of ytvh, especially during stress conditions.

-! SIMILARITY: Contains 1 PDZ/DHR domain.
